Coroner at Bangalore.

VIII. Proposed by the President that the Chief Commissioner be addressed with the view of bringing to notice the necessity that exists that a Coroner should be appointed for the Town and Cantonment of Bangalore.

Read also a memo on the subject communicated to the President.

Resolution.—The Commissioners are of opinion that the memo now read affords sufficient evidence of the necessity that exists of instituting a thorough and searching investigation into all cases of accidental, violent or suspicious deaths ; they are satisfied that under the present existing system of entrusting this duty to the police the ends of justice are but too often frustrated. and that it is absolutely necessary that some more satisfactory arrangement should now be adopted. With this object it is unanimously resolved that the Chief Commissioner be addressed with a view to the appointment of a Coroner for this station and for the extension to Bangalore of Act IV of 1871.

IX. Proposal by the President to bring all chatrams or bandy-stands within Municipal limits within the provisions of Sections 185 and 186 of the Bangalore Municipal Regulations of 1871

Resolution.—The President having explained to the meeting that, at the time of drafting the proposal now under consideration, he was ignorant that Section 137 of the Municipal Regulations fully met the requirements of the case, it is resolved that the Bye-law now proposed is unnecessary.

The following Bye-Laws are submitted for consideration and approval.

X. 1. Proposed Bye-Law for the better conservancy of houses and lands within Cantonment Municipal limits.

"All persons holding houses or land within the Municipal limits of the Cantonment of Bangalore are required to keep all drains and water channels in and about their premises free from obstruction, to remove all evident causes of malaria, and to cut the lower branches of all large trees to the height of six feet from the ground, so that there may be a free circulation of air below, and everywhere to discontinue as hedge the use of prickly pear, aloe, and milk hedge and to destroy these latter where at present existing.

All persons who, after due notice from the President has been given, fail to comply with the provisions of this Bye-Law shall, on conviction before a Magistrate, subject themselves to a penalty not exceeding20 rupees and to a further penalty of 10 rupees for each day the offence is continued after such conviction and after notice from the President of such continued infringement."

2. Proposed Bye-Law requiring all persons renting stalls at the Municipal markets to provide signboards to their respective stalls exhibiting their name and the number of the stall.

MONEY ORDER DEPARTMENT.

OVERLAND MONEY ORDERS.

No. 34. *The* 11*th October* 1875.

The following Circular is published for the guidance of the District Treasury Officers in Mysore and Money Order Agent, Saklespur, as well as for the information of the public.

H. HUDSON,
Dy. Acctl. General, and Controller, Money Order Dept. in Mysore.

From—The Assistant to Accountant General, Money Order Department, Bombay, To the Treasury Officer—Circular No. 10 of 1875-76, dated Bombay, 22nd September 1875.

While drawing your attention to this Office Circular No. 22, dated 4th December 1872, I beg to impress upon you again the importance of a due and careful observance of the instructions therein contained, which have been in too many cases neglected, to the dissatisfaction of the general public and the serious inconvenience of this Department.

2. In filling up the counterfoil receipts for Overland Money Orders the following points should be carefully attended to :—

(1.) The particulars of name and address of both remitter and payee should be given as fully as possible, and remitters should be informed that any insufficiency in these respects will render the order liable to delay in transmission, and may lead to its being paid to the wrong individual.

(2.) One Christian name at least should be given of both remitter and payee.

(3.) The address of the payee should contain not only the town or city of residence, but also the street, and the number of the house in that street: otherwise the London Post Office will probably decline to forward the Order to its destination.

(4.) The amount paid by the remitter and its equivalent in sterling, should be entered as carefully as possible, the former amount being written in words as well as figures.

(5.) The whole of the particulars entered in the counterfoil receipt should appear in a clear and unmistakeable hand. The neglect of this obvious rule has not only led to many unavoidable mistakes and delays in payment, but has in every case thrown a great deal of unnecessary labor on this office, the time and attention of which are in great part occupied in the attempt to decipher what is illegibly written and often incorrectly spelt.

3. In conclusion, I would express a hope that the instructions here given may be faithfully followed in future, and that it will not be necessary to draw your attention to the subject again.

SEASON REPORTS FOR THE MONTH OF SEPTEMBER 1875.

Bangalore District.

Rain.—There has been very little rain in the District during the month, and comparatively few tanks received small supplies of water.

Crops.—The crops are reported to be generally in good condition, though in some parts the dry crops look parched from want of rain. Horse gram, inferior oil seed, black gram, green gram, and paddy were sown; and sessamum and paddy harvested.

Health.—Generally good; cholera prevalent in the Kankanhalli Taluk, and a few cases also occurred in the Bangalore and Magadi Taluks.

Mortality.—The mortality among the inhabitants numbered 501 against 513 in August.

Cattle.—2,265 head of cattle carried off from various causes against 2,165 in August, *viz.*, from murrain 267, other diseases 1,957, and killed by wild beasts 41.

Lands.—Lands assessed at Rs. 1,914—15—7 were taken up for cultivation.

L. RICKETTS,
Offg. Dy. Commr.

Kolar District.

Rain-fall.—There has been no change in the weather. The average rain-fall during the month was 2 inches and 72½ cents. Rain is much wanted, as water in tanks and wells is getting scarce.

Lands.—Lands assessed at Rs. 1,718—6—2 were newly taken up for cultivation and no lands were relinquished during the month.

Crops.—Horse-gram and sessamum seeds were sown during the month and "Sajje" was harvested.

In most places the standing crops are reported to be withering for want of rain.

Health.—Fever and ague are on the decline. Public health is generally good. The particulars of deaths as compared with the previous month are as follows:—

	August 1875.	September 1875.
From Cholera ..	..	3
„ Fever ..	427	367
„ Small-pox ..	5	1
„ Bowel complaint	36	28
From accidents and injuries..	10	8
„ Other diseases ..	182	166
Total....	660	573

The births were 545 against 466 in August 1875.

Cattle.—The casualties among cattle were 1,423 against 1,777 in August 1875, as per following particulars:—

	August 1875.	September 1875.
Cows and bulls ..	439	454
Buffaloes ..	112	96

Total....	1,777	1,423

Prices.—The selling price of the principal food grains has a tendency to rise.

B. KRISHNAIENGAR,
Dy. Commr.

Tumkur District.

Rain.—The rain-fall was 6 inches and 48 cents as gauged at head-quarters of the District.

Crops.—The dry crops are reported to be generally in good average condition in all the Taluks except Chiknayakanhalli and Kunigal, owing to insufficiency of rain; in most Taluks some localities have suffered more than others. The seeds sown during the month were horse gram, huchellu and javar, and the crops harvested were areca and cocoanuts.

Health.—Generally good. There were 429 deaths as far as reports received against 435 of the previous month.

Cattle.—2,473 head of cattle died against 1,246 of the past month, of which 18 were from wild beasts.

C. J. PEARSE,
Dy. Commr.

Mysore District.

Rain.—No rain fell throughout the District till nearly the end of the month, but on the 23rd and 24th 1 inch 29 cents and 84½ cents respectively were registered.

Crops.—The want of rain as the crops were coming into ear, proved most disastrous. The jola crop in the Mysore, Chamrajnagar, Gundlupet and Mandya Taluks and portions of the Ashtagram and Nanjangúd Taluks failed completely. The gid-ragi crop in the Periyapatna and Yedatore Taluks, which once seemed so promising, did not yield half the ordinary quantity, and failed completely in several places. The rain came almost too late to save the dod-ragi, harka and rice crops, which were withering, and are still very backward.

Waste lands assessed at Rs. 620—1—3 were given out for cultivation during the month under report. Cotton, gram, green-gram, and castor oil seeds were sown during the month.

Health.—Cholera still prevails. 698 fatal cases occurred in the following taluks:—

In Mysore Taluk	..	55	In Nanjangúd Taluk	..	12
In Ashtagram do	..	5	In Talkad do	..	7
In Periyapatna do	..	3	In Mandya do	..	31
In Yedatore do	..	2	In Malvalli do	..	71
In Heggaddevankote do	..	37	In Mysore Town ..	..	412
In Gundlupet do	..	63			
				Total....	698

The death-rate from all causes increased from 783 in August to 1,317 in September.

Cattle.—Murrain among cattle still prevails in the Mysore, Ashtagram, Periyapatna, Gundlupet and Nanjangúd Taluks. The losses owing to that and other causes reached 1,416 head inclusive of 47 carried off by wild beasts.

Prices.—The price of food-grains has risen. 1st sort rice is sold in Mysore at 10 seers, 2nd sort at 10½, ragi at 20, horse-gram at 19, green-gram at 11¼, black-gram at 10 and dál at 9½ seers for the rupee.

W. HILL,
Dy. Commr.

Chitaldroog District.

Rain.—There was rain in all the Taluks of the District as detailed below:—

		Inches.	Cents.			Inches.	Cents.

Davangere	..	0	60	Budihal .	..	2	35
Kankuppa	..	3	0	Hosdurga ..	..	1	15
Dodéri ..	..	1	20	Pavagada ..	..	1	70

South-west winds prevailed throughout the month, and the average reading of the thermometer was 75·3 at 9·30 A. M. and 77·8 at 3·30 P.M.

Crops.—From the reports received it appears that in several parts the young crops have died, and the remainder to be in a fading condition, and it is feared that there will be a very scanty harvest this year.

The seeds sown during the month were cotton, white javari, ragi, horse-gram, sáve and navane, and that these are not in a thriving condition.

Health.—The health of the population was not good, as fever and ague prevailed to a great extent; the deaths from these and other diseases are reported to be 472 against 494 reported last month.

Cattle.—The number of cattle lost is reported to be 2,517 and the diseases which principally prevailed among them were murrain and hoof and mouth diseases.

The want of water and pasturage was much felt.

The prices of food-grain have arisen, owing to the failure of the monsoons.

SEASON REPORTS FOR THE MONTH OF SEPTEMBER 1875.

Hassan District.

Weather.—Clear, with occasional light showers, and heavy rain with thunder and lightning on the 21st and 25th of the month, at Hassan. The heaviest fall of rain was in the Malnad Taluk of Manjarabad, at the head-quarters of which Taluk (Saklespur) 7 inches 10 cents were gauged; while the lightest was at Channaraypatna, where only 37 cents were registered. From the following comparative statement it will be seen that the rain-fall was short of that recorded in the corresponding month of last year, except in the Taluks of Manjarabad, Arkalgúd and Narsipur.

Water-Supply.—The large tanks in this District contain a supply of water varying from one to six months, and the small ones from one to three months.

Lands.—Lands assessed at Rs. 841—5—6 were taken up for cultivation during the month; but none were resigned.

Crops.—The seeds sown during the month were horse-gram, sávé, and maize in the Hassan, Narsipur, Channaraypatna, Attikuppa, Nagamangala, and Harnhalli Taluks. The prospect of the crops is not encouraging, as the paddy crops alone in the Belur and Narsipur Taluks, and those sown broad cast in the Manjarabad Taluk, are reported to be in fair condition; the paddy and all other standing crops in the remaining Taluks, including the transplanted paddy in Manjarabad, being more or less withered for want of sufficient rain. Ragi was cut in the Manjarabad, Arkalgúd, and Belur Taluks and sugar-cane in that of Attikuppa.

Market.—The prices of 1st and 2nd sort rice remained stationary; while there was a considerable rise in those of ragi, and horse-gram in the Alur market. The following statement will shew the rates at which these articles were sold, compared with those of the preceding month and the month of September last year:—

Health.—Cholera appeared in the Channaraypatna, Attikuppa and Nagamangala Taluks; and the number of fatal cases up to the close of the month was 151, *viz*:—

Besides the mortality above shewn there were 567 deaths from other diseases, *viz* :—

Fever 370, small pox 6, bowel complaint 73, suicide 3, accident 3, other causes 112; 567 or 718 in all, against 399 in the previous month and 446 in that for September 1874.

Cattle.—Cattle disease prevailed in all the Taluks of the District save Harnhalli, and the loss from all causes amounted in all to 2,911, against 2,442 in the preceding month and 1,888 in September last year.

Shimoga District.

Rain.—A few showers of rain fell in all the Taluks of the District, but the quantity of rain gauged in this month is less than the corresponding month last year.

Crops.—The standing crops are reported to be withering fast from want of water. Horse-gram is sown in some of the Maidan Taluks. Supari and cardamom are reported to have been harvested in the Nagar Taluk.

Health.—Five hundred and sixty-one cases of death are registered against 511 in the month previous. The number of births recorded during the month under report is 510 against 483 of the preceding month.

Cattle.—The casualties among cattle were 2,285, of which 178 were by wild beasts.

Prices.—Rising.

C. S. BLAIR,
Offg. Dy. Commr.

Kadur District.

Rain.—The fall of rain throughout the District has been scanty. In the taluks of Banavar, Tarikere and Chikmagalur more rain is very much needed to revive the withering crops.

The following table furnishes readings of the thermometer and rain-fall recorded at the Chikmagalur Observatory for the past and present months as contrasted with the month of September 1874 :—

August 1875—	*Thermometer.* at 9—30 A. M.	73·7	At 3—30 P. M.	75·4	*Rain* 1 inch	24	cents.
September	1875	„	„	74·5	„	73·7	„	0	78½
Do	1874	„	„	72·11	„	74·11	„	3	66

Crops.—Ragi, avare, horse-gram, navane, &c., were sown in the taluks of Banavar, Tarikere and Chikmagalur. Standing crops are dying for want of rain. Sugar-cane, green and black grams and jola in Banavar, supari in Tarikere, sessamum, jola, gid-ragi, wheat, mustard, tadagani, coriander and cardamom in Chikmagalur are said to have been harvested. Supari in the Koppa Taluk has been damaged by blight.

Health.—The health of the District is indifferent ; fever and ague prevail in the taluks of Banavar, Tarikere and Koppa. The number of deaths reported from all causes is 313 in this, against 311 last month, and 337, September 1874.

Cattle.—The condition of live stock is on the whole bad. Murrain of the "Dod roga" and "Kalbayi jvara" types still prevails in all the taluks except Koppa. In the taluks of Lakvalli and Koppa, the mortality from wild beasts has been heavy.

Mortality.—Mortality from all causes amounts to 1,079 in this, against 625 last month, and 1,244 in September 1874.

Read also subsequent docket No. 2231, dated 27th September 1875, from the Secretary to the Chief Commissioner of Mysore, Department Public Works, supplementing the above grant by a further sum of Rs. 1,500 making the total grant to Rs. 4,000.

8. Read Proceedings of the Chief Commissioner of Mysore, No. 5185—Edl. 8, dated 23rd September 1875, requesting the opinion of the Members of the Municipal Commission as to the Municipality bearing a moiety of the Grant-in-aid towards the funds of the Anglo-Indian Aid Association.

Resolution.—The Commissioners while fully recognizing the importance of the object for which this grant is required would beg respectfully to point out that in their opinion it is undesirable that any part of funds which are raised from the entire population or placed at the Commissioners' disposal for general purposes should be devoted to endow an institution the object of which is to afford relief to only one section of the community, and that a very limited one as regards numbers.

The above Resolution having been put to the vote was carried by a majority, six having voted for and four against it.

Bangalore District.

Rain.—There has not been much rain in the District during the month, and consequently but few tanks received water, and that too in small quantities.

Crops.—Reported to be generally in fair condition, though in some parts the dry crops look parched from want of rain. Vaisak paddy, Bengal and horse-gram and inferior sessamum were sown, and the ragi crop was harvested in a few places.

Health.—Generally good; but cholera has been prevalent in the Devanhalli, Kankanhalli, Magadi and Closepet Taluks; and a few cases also occurred in the Bangalore and Hoskote Taluks.

Mortality.—The deaths among the people have numbered 668 against 501 in September, the increase being attributable to the prevalence of cholera and other diseases.

Catile.—A less number of cattle were lost in the month under report than in the month previous, *i.e.* 1,568 against 2,265, 231 being from murrain, 1,206 from other diseases and 131 killed by wild beasts.

Lands.—Lands assessed at Rs. 575—9—5 were taken up for cultivation, while none were resigned during the month.

B. KRISHNAIENGAR,
Dy. Commissioner.

Mysore District.

Rain.—Good heavy showers of rain fell during the month, which were very favorable to the dodragi and other standing crops, and brought a supply of water to a number of tanks. The rain-fall registered in Mysore was 5 inches 23 cents, or about the same as in the year previous.

Crops.—The crops though backward are thriving well since the fall of rain. Horse and Bengal-gram and sessamum have been sown.

Waste lands assessed at Rs. 296—15—10 were given out for cultivation during the month under report.

Health.—Although cholera has left the town of Mysore, it still prevails in several Taluks in the District : 305 fatal cases were reported during the month. The mortality from all causes has however fallen from 1,317 cases in September to 995 in October.

Cattle.—Murrain still prevails among cattle in the Mysore, Ashtagram, Periyapatna, Nanjangúd, Talkád, and Mandya Taluks. The losses owing to this and other diseases reached 1,583 head, inclusive of 91 carried off by wild beasts.

Prices.—The price of food grains has fallen slightly : 1st sort rice is sold in Mysore at 10, 2nd sort at 11, ragi at 21, horse-gram at 22, green-gram at 13, black-gram at 10 and dál at 9 seers for the rupee.

W. HILL,
Dy. Commissioner.

Hassan District.

Weather.—The season was not characterized by the heavy rains usual in this month of the year. On the contrary, the days were chiefly clear and unusually hot, while the mornings were foggy. The following statement, shewing the rain-fall registered at the District and Taluk Head-Quarters, as compared with that of the corresponding month of last year, will speak for itself.

Water-Supply.—The supply of water in the large tanks in the District varied from one to five months, and that in the small tanks from half to four months.

Lands.—Additional lands, assessed at Rs. 591—5—11, were taken up for cultivation ; while none were resigned.

Crops.—Bengal-gram was sown in the Hassan, Channaraypatna and Narsipur Taluks. Coriander was also sown in the latter taluk, as well as in that of Harnhalli. The paddy and ragi crops in the Malnad are doing well ; but the wet and dry standing crops in the Maidan Taluks are only in average condition, owing to a failure of the usual rains.

Market.—The latest quotations in the Alur market are shewn in the following comparative statement, from which it will be seen that the prices of rice and ragi have steadily risen over those of last month ; while there has been a fall in the price of horse-gram.

Health.—An Hospital Assistant from Mysore was specially detailed for cholera duty in the Channaraypatna Taluk at the early part of the month, owing to the prevalence of cholera in that Taluk, but it is pleasing to note that during the latter half of the month there was not a single case in the town of Channaraypatna itself, where the disease was, previously, the most virulent. There have, however, been some isolated cases in the Hassan, Narsipur, and Harnhalli Taluks during the month under report. The number of deaths from this cause amounted to 284 against 151 of the preceding month, *viz* :—

Season Report of the Kadur District for the month of October 1875.

The fall of rain throughout the District except Banavar has been scanty. In the Taluk of Banavar there has been 4 inches of rain and certain tanks in the Taluk have received about 2 months' supply of water, but those in the other Taluks have not been supplied with water. The cattle therefore are suffering for want of both water and fodder.

The following table furnishes readings of the thermometer and rain-fall recorded at the Chikmagalur Observatory for the past and present months as contrasted with the months of October 1874.

Crops.—Coriander, sugar-cane, and sessamum in the Banavar Taluk, Bengal and horse-gram in the Chikmagalur Taluk were sown. Ragi, avare, sugar-cane, tobacco, and sáve in the Banavar Taluk and paddy crops in the Lakvalli Taluk are failing for want of rain. Sugar-cane and coffee are generally in good condition and the standing crops in the Chikmagalur Taluk are withering. In the Koppa Taluk crops are generally good, and in the Tarikere Taluk standing crops are doing well and the rest withered.

Jola, sugar-cane in the Banavar, supari in the Taluks of Tarikere and Lakvalli, supari, ragi, sessamum, jola, and cardamom in the Chikmagalur Taluk are said to have been harvested.

Health.—The health of the District is indifferent. Fever and ague prevail in the Taluks of Tarikere, Koppa and Chikmagalur and cholera in Birur of Banavar Taluk and Kelagur of Chikmagalur Taluk.

The number of deaths reported by cholera is 3 and from all other causes 286 in this, against 313 last month and 280 in October 1874.

Cattle.—The condition of live-stock is on the whole bad. Murrain of the "Dod-Roga" and "Kalbayi" jvara types prevails in all the Taluks except Koppa. In the Taluks of Lakvalli, Koppa, Chikmagalur, and Banavar the mortality from wild beasts is reported to have been heavy.

The mortality from all causes amounts to 1,490 in this, against 1,079 last month, and 899 in October 1874.

POLICE DEPARTMENT.

Circular Order No. 2731—144, *dated Bangalore*, 22*nd November* 1875.

It has been the practice in some Districts to shew in the pending column (before Police) of the current monthly Crime Return, cases of 3 or 4 years' standing, and as this bears unfairly on the average working of the Police, it is hereby directed that this practice, wherever it obtains, be at once discontinued.

2. As a rule, the pending column in the Crime Return should shew only those cases reported during the current year and remaining undetected. At the close of the year, such cases as are still undetected must be omitted and not carried forward to the *new year*; but a separate return will be sent in of undetected cases of previous years as per form enclosed.

3. This latter return will shew in the aggregate *all* cognizable cases that remain undetected for the past 3 years and will be submitted for the 2nd half year 1875, and in future, on the 15th January and 15th July of each year for the past ½ year, and it is to be considered independent of the Quarterly Return ordered to be submitted in this Office No. 1637—86, dated 14th July last, shewing in detail undetected heinous cases.

ANCHE DEPARTMENT.

NOTIFICATION.

No. 449. *The 6th December* 1875.

The following Notification of the Government of India relating to Parcels posted in India for transmission to the United Kingdom by the Overland Parcel Post, received from the Postmaster General, Bombay, is published for general information.

M. AMURTALINGAM,
Anche Bakshi.

FINANCIAL DEPARTMENT.

NOTIFICATION.

SEPARATE REVENUE.—POST OFFICE.

Fort William, the 12th November 1875.

No. 2377.—Notice is hereby given that parcels posted in India, for transmission to the United Kingdom by the Overland Parcel Post, must not exceed £50 in value. Any parcel which on examination of the declaration at Bombay may be found to exceed this value will, instead of being forwarded by the Overland Parcel Post, be transferred to the Bombay Agency of the Peninsular and Oriental Steam Navigation Company for transmission independently of the Post Office, and subject to such regulations and charges on delivery as may be applicable thereto under the Company's regulations.

(NOTE.—The Company's present charge is an *ad valorem* rate of 2 per cent, which does not include Marine or other Insurance.)

The following detailed rules respecting the exchange of parcels with the United Kingdom and the foreign countries mentioned are to be substituted for the regulations given at pages 53 to 55 of the Indian Postal Guide for 1875 :—

Overland Parcel Post.

(1).—Parcels are received at any Post Office in India under the conditions and rates of charge mentioned below for transmission to the following countries, *viz*:—

Country.	Rate of charge per lb. or fraction thereof. Prepayment compulsory.	Remarks respecting special conditions, &c., applicable to particular Countries.
	Annas.	
United Kingdom ...	8	The prepayment carries the parcel as far as London, any additional charge which may become due on account of British custom duty or carriage beyond London being realized from the addressee. The attention of the public is invited to the fact that the British Post Office has no connection with the Overland Parcel Post; all arrangements out of India are made by the Peninsular and Oriental Steam Navigation Company, and enquiries proceeding from the United Kingdom should be addressed to that Company's Office, 122, Leadenhall Street, London, E. C. The British Post Office, however, has consented to exhibit in every Post Office of the United Kingdom a notice containing information on the subject of the Indian Parcel Post. Parcels must not exceed £50 in value. Any parcel which on examination of the declaration at Bombay may be found to exceed this value will, instead of being forwarded by the Overland Parcel Post, be transferred to the Bombay Agency of the P. & O. S. N. Company for transmission independently of the Post Office, and subject to such regulations and charges on delivery as may be applicable thereto under the Company's regulations. (NOTE.—The Company's present charge is an *ad valorem* rate of 2 per cent, which does not include Marine or other Insurance.)
Germany ...	8	The prepayment carries the parcel to destination. Should any custom duty become due, the amount will be charged on delivery. See also Rule 9 respecting compensation for damage or loss.
Denmark ...	8	The prepayment carries the parcel to the limit of German conveyance, a separate charge being made on delivery for conveyance beyond the German frontier, as well as for custom duty, should any become due. See also Rule 9 respecting compensation for damage or loss.
Sweden ... Norway ... Switzerland ...	8	The prepayment carries the parcel to the limit of German conveyance, a separate charge being made on delivery for conveyance beyond the German frontier, as well as for custom duty, should any become due. *From Rule 3 it will be seen that there must be also a second or duplicate declaration of contents and value.* See also Rule 9 respecting compensation for damage or loss.
France ... The Netherlands (Holland) ... Belgium ...	8	The prepayment carries the parcel to the limit of German conveyance, a separate charge being made on delivery for conveyance beyond the German frontier, as well as for custom duty, should any become due. *From Rule 3 it will be seen that there must be also a second or duplicate declaration of contents and value, and that the second or duplicate declaration should contain a statement of the weight (lbs. and ozs. or tolas) of the contents and should, if possible, be written in the French language.* See also Rule 9 respecting compensation for damage or loss.

(2).—Every parcel should be securely packed in a closed cover or case, and should bear the name and address of the person in the United Kingdom or foreign country for whom it is intended.

N. B.—The public are specially warned against the use of flimsy covers for articles transmitted by the Parcel Post. Heavy articles are sometimes sent with only paper covering insecurely tied with string: friction in transit detaches this cover, and damage and loss ensue. A covering of stout cloth or wax cloth, sewn at the edges, is recommended; but if the contents are liable to suffer from pressure, boxes of wood or tin should be used.

(3).—Every parcel should be accompanied by a separate paper headed with the address of the parcel and containing a *declaration of its contents and value* under the signature of the sender. Below the signature the address of the sender should be given.

For the parcels addressed to—	
The United Kingdom	Only one declaration as above described is required.
Germany	
Denmark	
Sweden	A second or duplicate declaration is also required.
Norway	
Switzerland.. ..	
France	A second or duplicate declaration is also required, and the sender is requested to enter in the declaration a statement of the weight (lbs. and ozs. or tolas) of the contents, and to write the second or duplicate declaration, if possible, *in the French language.* Should he be unable to do so, the Bombay Post Office will attach to the second or duplicate English declaration a French rendering thereof, but the sender is warned of the delay which may result from this.
The Netherlands (Holland)	
Belgium	

It is not deemed necessary to require exact adherence to any particular form of declaration, but the following specimen form may be useful to the senders of parcels :—

(5).—The parcel so made up must be *fully prepaid by means of postage stamps at the rate of* 8 *annas* per lb. (40 tolas) or fraction of a lb., care being taken that the stamps adhere firmly to the cover.

(6).—The parcel so made up must not exceed 50 lbs (25 seers) in weight, or 2 feet in length by 1 foot in breadth or depth. It will be received at any Post Office at the hours fixed for the receipt of ordinary banghy parcels, the usual receipt being given to the sender without reference to the mode of packing prescribed in the case of inland parcels for which receipts are claimed.

(7).—On arrival at Bombay the Post Master will take off the outer covering, and forward the inside parcel and the accompanying declaration or declarations to the country of inside address.

(8).—It is forbidden to send in these parcels opium or any liquid or any substance or material of a dangerous, damaging, or offensive kind.

(9).—In the case of parcels for or from Germany and the foreign countries served through Germany, compensation will be given by the responsible Post Office to the sender for loss or damage sustained in transit (cases of *sea risk* or of *vis major* or of the *own negligence of the sender* in respect of packing or otherwise excepted). Such compensation will in no case exceed 1½ rupee for each lb. weight or fraction thereof in respect of parcels forwarded from India, and 3 marks for each 500 grammes or fraction thereof in respect of parcels from Germany. Should the sender desire it, the compensation will be paid to the addressee instead of to himself.

SEASON REPORTS FOR THE MONTH OF NOVEMBER 1875.

Mysore District.

Rain.—Only a slight shower of rain fell during the month and was very partial. 18 cents were registered in Mysore.

Crops.—Owing to the absence of the customary rain at the most critical period, the ragi crop has failed generally throughout the country. In the most favored localities not half the usual yield will be obtained, while in many localities, particularly in the Mandya and Gundlupet Taluks, the yield will be merely nominal.

The gram crop, which the ryots sowed on the failure of the jola crop, is withering away from want of rain.

The return from the rice crop below the river channels will be below the average, as it had no showers of rain to bring it on. Many parts of the country have not received a supply of water for irrigation as tanks have not been filled. Bengal-gram and coriander seeds were sown in the Mysore, Yedatore and Heggaddevankote Taluks.

Health.—Cholera is on the decrease. It has left the town of Mysore entirely, but still prevails to some extent in the Taluks. 96 fatal cases were reported during the month. The country is comparatively free from fever.

Cattle.—Murrain still prevails among cattle in the Ashtagram, Periyapatna and Nanjangúd Taluks. The losses owing to this and other causes amounted to 1,131 head, inclusive of 113 carried off by wild beasts.

Prices.—The fluctuations in the price of food grains have been considerable. They shew a marked tendency to rise to famine prices. 1st sort rice was sold in Mysore at the end of the month at 10, 2nd sort at 10½, ragi at 20, horse-gram at 23, green gram at 16, Bengal-gram at 10 and dál at 10 seers for the rupee.

W. HILL,
Dy. Commr.

Shimoga District.

Rain.—The total quantity of rain gauged during the month was 3 inches 81¾ cents, *viz*:—

	Inches.	Cents.		Inches.	Cents.
Shimoga	0	15	Nagar	1	58¾
Chaunagiri	0	28	Kavaledurga	1	50
Ságar	0	30	Total....	3	81¾

Crops.—Paddy and ragi were reported to have been harvested in all the Maidan Taluks, and supari, cardamoms and coffee in the Malnad Taluks. Sugar-cane and other crops, under growth, were reported to be in pretty good condition.

Health—On the whole not very good. The total number of deaths registered during the month, including those from cholera which made its appearance in some of the taluks, amounted to 754, being 183 in excess of the number of the previous month.

The total number of births reported was 474, being less by 62 than of the month previous.

Cattle.—Total loss of cattle during the month under report, from murrain, "foot and mouth" and from other diseases were 1,021, and 63 by wild-beasts, against 2,277 in the month previous.

Prices—Rising, owing to the want of briskness in the trade from the breaking out of cholera in the town and other localities, which deterred traders and the people from villages around and other places from bringing their commodities to market.

S. B. KRISHNASWAMAIENGAR,
For Offg. Dy. Commr.

Hassan District.

Weather.—Bright clear days, with occasional foggy mornings. Slight rain fell on the 9th in all the Taluks of the District except Nagamangala, Harnhalli and Narsipur, and the quantity gauged at head-quarters being 26 cents.

Water-supply.—The supply of water in 303 large and 2,805 small tanks varies from one to four months, while 37 large and 1,715 small tanks were dry.

Lands.—Lands assessed at Rs. 754—1—4 were newly taken up for cultivation during the month under report, while none were resigned.

Crops.—Bengal-gram was sown in the Taluks of Hassan, Harnhalli, Channaraypatna, Belur and Nagamangala, and coriander seed in that of Narsipur. Paddy was cut in the Taluks of Manjarabad, Hassan, Arkalgúd and Attikuppa, and ragi in the former taluk. Coffee and cardamoms were being picked. The other standing crops in all the Taluks are only in average condition and suffering from failure of the usual rains. Sugar-cane is doing well in the Hassan Taluk.

Market.—The prices of all articles of consumption have steadily increased and the market poorly supplied.

Health.—It is gratifying to note that, though cholera prevailed in 5 taluks out of the 9 taluks of the District, the number of fatal cases was 47 against 284 in the previous month. Colds and fever prevailed in the Belúr, Manjarabad and Arkalgúd Taluks. There were 398 deaths from all causes during the month against 731 in the previous month, as per following detail, *viz*:—

Cholera	47	Snake bite	1
Small-pox	1	Accidents	5
Fever	221	Other causes.. ..	84
Bowel complaint	39		
		Total....	398

Cattle.—Murrain, foot and mouth diseases were prevalent among cattle in the District. The casualty during the month under report among cattle being 2,708, of which 15 were killed by wild beasts, against 2,894 in October last.

A. SRINIVASAIENGAR,
For Offg. Dy. Commr.

Kadur District.

The fall of rain throughout the District, except in the Chikmagalur Taluk, has been scanty. The scarcity of both water and fodder is on the increase.

The following table furnishes readings of the thermometer and rain-fall recorded at the Chikmagalur Observatory for the past and present month as contrasted with the month of November 1874.

October 1875-	*Thermometer* at 9—30 A. M.	76	14	At 3—30 P. M.	82·	*Rain*	2	inches	15 cents.
November 1875	„	„	72.5	„	76 9	„	0	0	„
November 1874	„	„	72·13	„	80 6	„	1	54	„

Crops.—Bengal-gram in the Taluks of Banavar, Tarikere and Chikmagalur; coriander and menthya in the two former and wheat in the latter have been sown. Standing-crops in all the taluks are reported to be withering on account of the failure of seasonable rain and the yield is anticipated to fall short of the out-turn of past years. Ragi, sáve, chillies and navane in the Banavar Taluk, and jola and ragi in the Tarikere taluk are reported to have been harvested.

Health.—The health of the District is indifferent. Cholera prevails in the Taluks of Banavar and Chikmagalur, and fever and ague in the Taluks of Tarikere, Koppa and Lakvalli.

The total number of deaths reported from all causes is 302 in this, against 286 last month, and 290 in November 1874.

Cattle.—The condition of live stock is on the whole bad. Murrain of the "Dod-roga" and "Kalbayi jvara" types prevails in all the Taluks except Koppa. The mortality from wild beasts is reported to have been heavy in the Taluks of Lakvalli and Koppa.

The total mortality from all causes amounts to 1,444 in this, against 1,490 last month and 782 in November 1874.

STATEMENT OF OBJECTS AND REASONS.

Doubts having been raised whether under the present Telegraph Act (VIII of 1860) rules can be framed for Telegraphs established under the repealed Act XXXIV of 1854, the present Bill has been prepared with the primary object of repealing and re-enacting Act VIII of 1860, with such change as will preclude all question as to the extent of the power above referred to.

The opportunity has been taken to make certain other alterations in the law, of which the chief are as follows:—

The present law declares that Railway Companies shall permit Government to establish Telegraphs on their land, but provides no penalty for refusing such permission; the Bill (Section 12) supplies this defect.

The section relating to injuries to Telegraphs has been made more specific, the wording of 24 and 25 Vic., cap. 97, Section 37, being here followed.

A clause founded on Sections 14 and 15 of the Police Act V of 1861 has been introduced to empower the Local Government to employ additional Police in places where mischief to Telegraphs is repeatedly committed, and to charge the inhabitants with the cost of the Police so employed.

The clause imposing penalties for sending fabricated messages has been made to apply to messages sent by Telegraphs established by a Company or person licensed under the proposed Act, as well as to messages sent by Government Telegraphs.

Fraudulently retaining or wilfully secreting telegraphic messages is made penal. An analogous clause is contained in the Post Office Act (XIV of 1866), Section 45.

Sections 16, 17, 18, 19 and 20 of Act VIII of 1860, which relate to fines and jurisdiction, have been omitted, as rendered unnecessary by Acts I of 1868 and X of 1872.

STATEMENT OF OBJECTS AND REASONS.

Doubts having been raised whether under the present Telegraph Act (VIII of 1860) rules can be framed for Telegraphs established under the repealed Act XXXIV of 1854, the present Bill has been prepared with the primary object of repealing and re-enacting Act VIII of 1860, with such change as will preclude all question as to the extent of the power above referred to.

The opportunity has been taken to make certain other alterations in the law, of which the chief are as follows :—

The present law declares that Railway Companies shall permit Government to establish Telegraphs on their land, but provides no penalty for refusing such permission ; the Bill (Section 12) supplies this defect.

The section relating to injuries to Telegraphs has been made more specific, the wording of 24 and 25 Vic., cap. 97, Section 37, being here followed.

A clause founded on Sections 14 and 15 of the Police Act V of 1861 has been introduced to empower the Local Government to employ additional Police in places where mischief to Telegraphs is repeatedly committed, and to charge the inhabitants with the cost of the Police so employed.

The clause imposing penalties for sending fabricated messages has been made to apply to messages sent by Telegraphs established by a Company or person licensed under the proposed Act, as well as to messages sent by Government Telegraphs.

Fraudulently retaining or wilfully secreting telegraphic messages is made penal. An analogous clause is contained in the Post Office Act (XIV of 1866), Section 45.

Sections 16, 17, 18, 19 and 20 of Act VIII of 1860, which relate to fines and jurisdiction, have been omitted, as rendered unnecessary by Acts I of 1868 and X of 1872.

Concerning the binding of Apprentices.

For better enabling children, and especially orphans and poor children brought up by public charity, to learn trades, crafts and employments, by which, when they come to full age, they may gain a livelihood, It is enacted as follows :—

I. Any child, above the age of ten, and under the age of eighteen years, may be bound apprentice by his or her father or guardian to learn any fit trade, craft or employment, for such term as is set forth in the contract of apprenticeship not exceeding seven years, so that it be not prolonged beyond the time when such child shall be of the full age of twenty-one years, or in the case of a female, beyond the time of her marriage.

II. The age set forth in the contacts shall be evidence of the age of the child, in all questions which arise as to the right of the master to the continuance of the service.

III. Any Magistrate or Justice of the Peace may act with all the powers of a guardian under this Act, on behalf of any orphan, or poor child abandoned by its parents, or of any child convicted before him, or any other Magistrate of vagrancy, or the commission of any petty offence, *or required to find security for good behaviour.*

VIII. Every contract of apprenticeship shall be in writing, according to the form given in the Schedule (A.) annexed to this Act, or to the like effect, which shall set forth the conditions agreed upon particularly specifying the age of the apprentice, the term for which he is bound, and what he is to be taught.

IX. Every such contract shall be signed by the person to whom the apprentice is bound, and by the person by whom he is bound, and by the apprentice, when he is of the age of fourteen years or more at the time of binding, but, when the apprentice is bound by the Governors, Directors or Managers of a Public Charity, the signature of two of them, or of their Secretary or Officer, shall be sufficient on behalf of the persons binding the apprentice.

X. No such contract shall be valid unless it be executed in the manner aforesaid, nor until it has been deposited in the office of the Chief Magistrate of the place or district where it has been executed, and the person in whose office any such contract is deposited shall give to each of the parties a copy thereof, certified under his hand, which certified copies shall be received as evidence of the contract, without formal proof of the handwriting of the Magistrate.

XI. The terms of service may be changed at any time during the apprenticeship, or the contract may be determined, with the consent of both parties to the contract or their personal representatives, and with the consent of the apprentice, if he is above the age of fourteen years; provided, that the changes agreed to or the termination of the contract shall be expressed in writing on the original contract, with the signature of the proper parties according to Section IX of this Act; and the Magistrate shall thereupon make under his hand corresponding endorsements on the office copies, which shall be brought to him at the same time for that purpose.

XII. The master of any apprentice bound under this Act may with the consent of the person by whom he was bound, and with the consent of the apprentice, if he is above the age of fourteen years, assign such apprentice to any other person, who is willing to take him for the residue of his apprenticeship, and subject to the conditions thereof; provided that such person shall, by endorsement under his own hand on the contract, declare his acceptance of such assignment, and acknowledge himself bound by the agreements and covenants therein mentioned, to be performed on the part of the master, and that the consent of the other parties foresaid shall be expressed in writing on the same, and signed by them respectively: And every such assignment shall be certified on the office copies of the contract under the hand of the Magistrate according to the form given in Schedule (B.) annexed to this Act.

XIII. Upon complaint made to any Magistrate by or on behalf of any apprentice bound under this Act, of refusal or neglect to provide for him, or to teach him according to the contract of apprenticeship, or of cruelty, or other ill-treatment by his master, or by the agent under whom he shall have been placed by his master, the Magistrate may summon the master or his agent, as the case may be, if he shall be within his jurisdiction, to appear before him at a reasonable time, to be stated in the summons, to answer the complaint; and at such time, whether the master or his agent be present or not, (service of the summons being proved), may examine into the matter of the complaint; and, upon proof thereof, may cancel the contract of apprenticeship, and assess upon the offender, whether he shall be the master or his agent, a reasonable sum for benefit of the apprentice, not exceeding four times the amount of the

premium paid upon the binding, or if no premium, or a less premium than Fifty Rupees was paid, not exceeding Two Hundred Rupees; and, if the offender shall not pay the sum so assessed, may levy the same by distress and sale of his goods and chattels, and if the offender shall not be the master but his agent, by distress and sale of the goods and chattels of the master also.

XV. Upon complaint made to any Magistrate, by or on behalf of the master of any apprentice bound to him under this Act, of any ill-behaviour of such apprentice, or if such apprentice shall have absconded, the Magistrate may issue his warrant for apprehending such apprentice, and may hear and determine the complaint, and punish the offender by an order for keeping the offender, if a boy, in confinement in any debtor's prison or other suitable place, not being a criminal gaol, for any time not exceeding one month, of which one week may be in solitary confinement, during which time such allowance shall be made for his subsistence by the master or his agent as the Magistrate shall order; and, if the offender be a boy of not more than fourteen years of age, may order him to be privately whipped: or, if the offender be a girl, or in the case of any boy, the Magistrate deem any such punishment unfit, he may pass an order empowering the master of the apprentice or his agent to keep the offender in close confinement in his own house, upon bread and water, or such other plain food as may be given without injury to the health of the apprentice, for a period not exceeding one month.

XVI. Upon complaint of wilful and repeated ill-behaviour on the part of the apprentice, and on the demand of the master, the Magistrate may order the contract of apprenticeship to be cancelled, whether or not the charge is proved; but only with the consent of the apprentice and of his father or guardian, if the charge is not proved: and such cancelling shall be with or without refund of the whole or part of any premium that may have been paid to the master on binding such apprentice, as to the Magistrate seems fit, on consideration of the case; and all sums so refunded shall be applied under the direction of the Magistrate for behoof of the apprentice.

XVII. The Magistrate may order any sum recovered for behoof of the apprentice on cancelling the contract to be either laid out in binding him to another master, or otherwise for his benefit, or to be paid to the person by whom any premium was paid when he was bound apprentice.

XVIII. No Magistrate shall entertain a complaint on the part of a master against an apprentice under this Act, unless it be brought within one month after the cause of complaint arose; and no Magistrate shall entertain a complaint on the part of an apprentice against his master or the agent of his master under this Act, unless it be brought within three months after the cause of complaint arose.

XIX. If the master of any apprentice shall die before the end of the apprenticeship, the contract of apprenticeship shall be thereby determined; and a proportionate part, corresponding to the unexpired portion of the term, of any premium, which shall have been paid to such master on the binding of the apprentice to him, shall be returned by the *legal representatives* out of the estate of the deceased to the person or persons who shall have paid the same; unless the *legal representatives* of the deceased master shall continue the business in which such apprentice shall have been employed, and shall, within three months from the death of the late master, make offer in writing to keep the apprentice on the terms of the original contract; in which case the estate of the deceased shall be discharged from all liabilities on account of such premium.

XX. If such offer to keep the apprentice shall be made as aforesaid, the same shall be fully expressed and certified by the *legal representatives* on the original contract of apprenticeship; and also on the office copies thereof, by the Magistrate; and the apprentice shall be bound to the executors or administrators so keeping him for the remaining term of his apprenticeship.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to establish in British India institutions which, so far as regards males, may serve the combined purposes of the Reformatory Schools and the Industrial Schools so successfully carried on in England under 29 & 30 Vic., cc. 117, 118.

The peculiar circumstances of India render it inexpedient to bring girls within the scope of the Bill.

With the previous sanction of the Governor General in Council, Local Governments are empowered to establish Reformatory Schools (which are defined so as to include schools in which industrial training is provided), or to use as Reformatory Schools, schools kept by persons willing to obey such rules as Government may prescribe.

Provision is made that these schools shall be furnished with the proper requisites and periodically inspected.

Three classes of boys may be sent to Reformatory Schools:

(a) boys under 14 convicted of offences punishable with transportation or imprisonment, but not sentenced;

(b) boys under 12 sentenced to imprisonment; and—

(c) boys under 14 who associate with thieves, vagrants, &c., or are without visible means of subsistence.

The minimum time for which a boy will be sent to a Reformatory School is two years, the maximum seven years. But no boy will be detained after he attains the age of 16.

As to the expenses of these schools, Municipalities are empowered, with the sanction of the Loca Government, to apply municipal funds to establish or maintain Reformatory Schools, and Magistrates of the first class are empowered to order the parents of youthful offenders to contribute a moderate monthly sum to their support.

The Bill contains provisions as to the Boards which are to control and manage the Schools. Two at least of these managers will always be Natives of India. The Board will have power to license youthful offenders to employers of labor; to cancel such licenses at the employer's request; to apprentice youthful offenders; and to make subsidiary rules.

Lastly, the Bill contains some clauses as to offences in relation to Reformatory Schools.

VIII. Every contract of apprenticeship shall be in writing, according to the form given in the Schedule (A.) annexed to this Act, or to the like effect, which shall set forth the conditions agreed upon particularly specifying the age of the apprentice, the term for which he is bound, and what he is to be taught.

IX. Every such contract shall be signed by the person to whom the apprentice is bound, and by the person by whom he is bound, and by the apprentice, when he is of the age of fourteen years or more at the time of binding; but, when the apprentice is bound by the Governors, Directors or Managers of a Public Charity, the signature of two of them, or of their Secretary or Officer, shall be sufficient on behalf of the persons binding the apprentice.

X. No such contract shall be valid unless it be executed in the manner aforesaid, nor until it has been deposited in the office of the Chief Magistrate of the place or district where it has been executed, and the person in whose office any such contract is deposited shall give to each of the parties a copy thereof, certified under his hand, which certified copies shall be received as evidence of the contract, without formal proof of the handwriting of the Magistrate.

XI. The terms of service may be changed at any time during the apprenticeship, or the contract may be determined, with the consent of both parties to the contract or their personal representatives, and with the consent of the apprentice, if he is above the age of fourteen years; provided, that the changes agreed to or the termination of the contract shall be expressed in writing on the original contract, with the signature of the proper parties according to Section *IX* of this Act; and the Magistrate shall thereupon make under his hand corresponding endorsements on the office copies, which shall be brought to him at the same time for that purpose.

XII. The master of any apprentice bound under this Act may, with the consent of the person by whom he was bound, and with the consent of the apprentice, if he is above the age of fourteen years, assign such apprentice to any other person, who is willing to take him for the residue of his apprenticeship, and subject to the conditions thereof; provided that such person shall, by endorsement under his own hand on the contract, declare his acceptance of such apprentice, and acknowledge himself bound by the agreements and covenants therein mentioned, to be performed on the part of the master, and that the consent of the other parties aforesaid shall be expressed in writing on the same, and signed by them respectively: And every such assignment shall be certified on the office copies of the contract under the hand of the Magistrate according to the form given in Schedule (B.) annexed to this Act.

XIII. Upon complaint made to any Magistrate by or on behalf of any apprentice bound under this Act, of refusal or neglect to provide for him, or to teach him according to the contract of apprenticeship, or of cruelty, or other ill-treatment by his master, or by the agent under whom he shall have been placed by his master, the Magistrate may summon the master or his agent, as the case may be, if he shall be within his jurisdiction, to appear before him at a reasonable time, to be stated in the summons, to answer the complaint; and at such time, whether the master or his agent be present or not, (service of the summons being proved), may examine into the matter of the complaint; and, upon proof thereof, may cancel the contract of apprenticeship, and assess upon the offender, whether he shall be the master or his agent, a reasonable sum for behoof of the apprentice, not exceeding four times the amount of the

premium paid upon the binding, or if no premium, or a less premium than Fifty Rupees was paid, not exceeding Two Hundred Rupees ; and, if the offender shall not pay the sum so assessed, may levy the same by distress and sale of his goods and chattels, and if the offender shall not be the master but his agent, by distress and sale of the goods and chattels of the master also.

XIV. No contract of apprenticeship shall be cancelled, nor shall any master or his agent be liable to any criminal proceeding, on account of such moderate chastisement for misbehaviour, given to any apprentice by his master or the agent of his master, as may lawfully be given by a father to his child ; and the provision for enabling the contract of apprenticeship to be cancelled shall not bar any criminal proceeding against any master or his agent for an assault or other offence committed against his apprentice, for which he would be liable to be punished, had it been against his child ; whether or not any proceedings be taken for cancelling the contract of apprenticeship.

XV. Upon complaint made to any Magistrate, by or on behalf of the master of any apprentice bound to him under this Act, of any ill-behaviour of such apprentice, or if such apprentice shall have absconded, the Magistrate may issue his warrant for apprehending such apprentice, and may hear and determine the complaint, and punish the offender by an order for keeping the offender, if a boy, in confinement in any debtor's prison or other suitable place, not being a criminal gaol, for any time not exceeding one month, of which one week may be in solitary confinement, during which time such allowance shall be made for his subsistence by the master or his agent as the Magistrate shall order ; and, if the offender be a boy of not more than fourteen years of age, may order him to be privately whipped : or, if the offender be a girl, or in the case of any boy, the Magistrate deem any such punishment unfit, he may pass an order empowering the master of the apprentice or his agent to keep the offender in close confinement in his own house, upon bread and water, or such other plain food as may be given without injury to the health of the apprentice, for a period not exceeding one month.

XVI. Upon complaint of wilful and repeated ill-behaviour on the part of the apprentice, and on the demand of the master, the Magistrate may order the contract of apprenticeship to be cancelled, whether or not the charge is proved ; but only with the consent of the apprentice and of his father or guardian, if the charge is not proved : and such cancelling shall be with or without refund of the whole or part of any premium that may have been paid to the master on binding such apprentice, as to the Magistrate seems fit on consideration of the case ; and all sums so refunded shall be applied under the direction of the Magistrate for behoof of the apprentice.

XVII. The Magistrate may order any sum recovered for behoof of the apprentice on cancelling the contract to be either laid out in binding him to another master, or otherwise for his benefit, or to be paid to the person by whom any premium was paid when he was bound apprentice.

XVIII. No Magistrate shall entertain a complaint on the part of a master against an apprentice under this Act, unless it be brought within one month after the cause of complaint arose ; and no Magistrate shall entertain a complaint on the part of an apprentice against his master or the agent of his master under this Act, unless it be brought within three months after the cause of complaint arose.

XIX. If the master of any apprentice shall die before the end of the apprenticeship, the contract of apprenticeship shall be thereby determined ; and a proportionate part, corresponding to the unexpired portion of the term, of any premium, which shall have been paid to such master on the binding of the apprentice to him, shall be returned by the *legal representatives* out of the estate of the deceased to the person or persons who shall have paid the same ; unless the *legal representatives* of the deceased master shall continue the business in which such apprentice shall have been employed, and shall, within three months from the death of the late master, make offer in writing to keep the apprentice on the terms of the original contract ; in which case the estate of the deceased shall be discharged from all liabilities on account of such premium.

XX. STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to establish in British India institutions which, so far as regards males, may serve the combined purposes of the Reformatory Schools and the Industrial Schools so successfully carried on in England under 29 & 30 Vic., cc. 117, 118.

The peculiar circumstances of India render it inexpedient to bring girls within the scope of the Bill.

With the previous sanction of the Governor General in Council, Local Governments are empowered to establish Reformatory Schools (which are defined so as to include schools in which industrial training is provided), or to use as Reformatory Schools, schools kept by persons willing to obey such rules as Government may prescribe.

Provision is made that these schools shall be furnished with the proper requisites and periodically inspected.

Three classes of boys may be sent to Reformatory Schools:

(*a*) boys under 14 convicted of offences punishable with transportation or imprisonment, but not sentenced;

(*b*) boys under 12 sentenced to imprisonment; and—

(*c*) boys under 14 who associate with thieves, vagrants, &c., or are without visible means of subsistence.

The minimum time for which a boy will be sent to a Reformatory School is two years, the maximum seven years. But no boy will be detained after he attains the age of 16.

As to the expenses of these schools, Municipalities are empowered, with the sanction of the Local Government, to apply municipal funds to establish or maintain Reformatory Schools, and Magistratesof the first class are empowered to order the parents of youthful offenders to contribute a moderate monthly sum to their support.

The Bill contains provisions as to the Boards which are to control and manage the Schools. Two at least of these managers will always be Natives of India. The Board will have power to license youthful offenders to employers of labor; to cancel such licenses at the employer's request; to apprentice youthful offenders; and to make subsidiary rules.

Lastly, the Bill contains some clauses as to offences in relation to Reformatory Schools.

XV. Upon complaint made to any Magistrate, by or on behalf of the master of any apprentice bound to him under this Act, of any ill-behaviour of such apprentice, or if such apprentice shall have absconded, the Magistrate may issue his warrant for apprehending such apprentice, and may hear and determine the complaint, and punish the offender by an order for keeping the offender, if a boy, in confinement in any debtor's prison or other suitable place, not being a criminal gaol, for any time not exceeding one month, of which one week may be in solitary confinement, during which time such allowance shall be made for his subsistence by the master or his agent as the Magistrate shall order ; and, if the offender be a boy of not more than fourteen years of age, may order him to be privately whipped : or, if the offender be a girl, or in the case of any boy, the Magistrate deem any such punishment unfit, he may pass an order empowering the master of the apprentice or his agent to keep the offender in close confinement in his own house, upon bread and water, or such other plain food as may be given without injury to the health of the apprentice, for a period not exceeding one month.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to establish in British India institutions which, so far as regards males, may serve the combined purposes of the Reformatory Schools and the Industrial Schools so successfully carried on in England under 29 & 30 Vic., cc. 117, 118.

The peculiar circumstances of India render it inexpedient to bring girls within the scope of the Bill.

With the previous sanction of the Governor General in Council, Local Governments are empowered to establish Reformatory Schools (which are defined so as to include schools in which industrial training is provided), or to use as Reformatory Schools, schools kept by persons willing to obey such rules as Government may prescribe.

Provision is made that these schools shall be furnished with the proper requisites and periodically inspected.

Three classes of boys may be sent to Reformatory Schools:

(a) boys under 14 convicted of offences punishable with transportation or imprisonment, but not sentenced;

(b) boys under 12 sentenced to imprisonment; and—

(c) boys under 14 who associate with thieves, vagrants, &c., or are without visible means of subsistence.

The minimum time for which a boy will be sent to a Reformatory School is two years, the maximum seven years. But no boy will be detained after he attains the age of 16.

As to the expenses of these schools, Municipalities are empowered, with the sanction of the Local Government, to apply municipal funds to establish or maintain Reformatory Schools, and Magistrates of the first class are empowered to order the parents of youthful offenders to contribute a moderate monthly sum to their support.

The Bill contains provisions as to the Boards which are to control and manage the Schools. Two at least of these managers will always be Natives of India. The Board will have power to license youthful offenders to employers of labor; to cancel such licenses at the employer's request; to apprentice youthful offenders; and to make subsidiary rules.

Lastly, the Bill contains some clauses as to offences in relation to Reformatory Schools.

7. Whoever sells opium in contravention of rules so made and published, or before such rules are so made and published, shall for every such offence be punished with fine which may extend to one thousand rupees, and, in default of payment of such fine, with imprisonment for a term which may extend to six months.

XXI of 1856, ss. 28, 34.
For unlawful sale of opium.

STATEMENT OF OBJECTS AND REASONS.

The poppy is grown extensively in Lower Bengal, the North-Western Provinces, Oudh and Central India, and to some slight extent in the Panjáb, the Central Provinces, Berar and Mysore, and in part of Bombay. Little or no opium is produced in Madras, British Burma or Assam.

The attention of Local Governments and of the Government of India has of late been frequently drawn to the insufficiency of the existing law on the subject.

In the Bengal Presidency, including the North-Western Provinces, Oudh and the Panjáb, the law is clear and satisfactory.

But in some of the more recently formed Administrations, such as the Central Provinces, Assam and British Burma, the applicability of the Bengal law is doubtful, and in Bombay and Madras the law on the subject is altogether defective.

In the Bombay Presidency, the same control is in point of fact exercised as in Bengal for checking the growth of the poppy and the manufacture of opium; but the legal authority for this action is insufficient.

In Madras no check, either legislative or administrative, exists at present on the growth of the poppy or the transport, possession or storage of opium, and practices have resulted injurious alike to the public revenue and to public morality and health.

The Governments of Madras and Bombay have both contemplated supplying these defects by local legislation. But it is considered expedient by one simple and comprehensive Imperial law to ensure that the Imperial revenue derived from opium is no where left without adequate protection.

The Bill, as now introduced, will not alter the state of things prevailing in the Bengal Presidency, nor will it involve any alteration of practice inconsistent with the system of export duty in force in Western India. The control exercised by the State in Bengal and Northern India, is equally necessary whichever system prevails. The power which Government by law possesses in the Bengal Presidency will now be extended to all parts of India,—doubts, where they exist, will be removed,—and the needed legislation will be provided for Madras and Bombay.

NOTIFICATION.

GENERAL.

Simla, the 24th September 1875.

No. 1952, *G.*—The following despatch from Her Majesty's Secretary of State for India, No. 107 dated 19th August 1875, giving formal intimation of the intended visit of HIS ROYAL HIGHNESS THE PRINCE OF WALES to India, is published for general information :—

To His Excellency the Right Hon'ble the Governor General of India in Council.

MY LORD,

Para 1. I have to convey to you formally the information which Your Excellency has already received by telegraph, that it is the intention of His Royal Highness the Prince of Wales to visit the dominions of Her Majesty in the East. I am assured of the pleasure with which Your Excellency will welcome His Royal Highness.

2. Your Excellency will receive in due course intimation of the dates fixed for His Royal Highness' departure from England and arrival in India, and of the numbers of the suite by which he will be attended.

3. Your Excellency as Viceroy will represent Her Majesty in receiving His Royal Highness with all the honors befitting his exalted rank, and Her Majesty's Government feel assured of the earnest and loyal desire of Your Excellency and of all Officers under your control to omit no circumstance which can contribute to His Royal Highness' comfort in visiting, as far as time allows, all that is most interesting in those provinces of the British Empire in the East which are under your control.

4. The sojourn which His Royal Highness purposes to make will only be sufficient to bring before him a small portion of the vast multitudes of various races who live directly under English rule. But he will doubtless have presented to him many of the most eminent Officers, Civil and Military, European and Native, who, under Your Excellency, bear rule among them, and he will see some of the most important divisions of that great army to which the defence of the Empire is confided, and in which His Royal Highness now bears the highest rank.

5. His Royal Highness will have the opportunity, which he will highly value, of personally conveying to the Chiefs and Princes who rule in India under the paramount protection of the Queen of England the assurance of those gracious sentiments which have ever been entertained towards them by His Royal House.

6. Her Majesty has been graciously pleased to mark her sense of the importance and dignity of the occasion by empowering His Royal Highness to hold a special investiture of the Order of the Star of India, of which Your Excellency is Grand Master.

7. At this and all other ceremonials Her Majesty's Government feel assured that the supreme authority with which Your Excellency is invested as Her Majesty's Representative will enable you to shew how highly you estimate the proof of Her Majesty's good will and Her confidence in the loyalty of Her Indian subjects which are afforded by Her sanctioning the visit of the Prince to India.

I have, &c.

PART IV.

Miscellaneous Papers.

Extract from the Annual Report of the Superintendent of Government Farms, Madras Presidency, for the year ending 31*st March* 1874.

* * * * *

Para 44. *Live Fences.*—The appearance of the country might be greatly improved if our ryots could be induced to plant live fences around their fields; such fences would be of use in many ways, they would protect crops from damage by trespassing cattle, they would moderate the force of the wind, and lessen the losses that are sometimes experienced about harvest time from the effects of storms; they would render the herding of cattle and sheep unnecessary, and be of use in many other ways, but their chief use would be to afford fuel for domestic purposes, the cattle dung now used by the ryot as fuel being set free for use in a legitimate way.

45. There are many kinds of shrubs admirably adapted for forming fences, each suited to the various conditions met with in different parts of the Presidency. One of the most generally useful is the corkapilly (*Inga dulcis*) which resembles the English hedge-thorn very much in general appearance, and which has been grown on a considerable scale on the Sydapet Farms. A hedge of this shrub can be raised at a very moderate expenditure of labor, it is only necessary to dig a trench about 1½ feet deep and 12 inches wide along the line of the proposed fence, and to fill this trench with a mixture of good surface soil and any manure that is available; when this is done the seed is to be sown, say in three parallel lines at equal distances in the trench. If the seed is put down with the first showers of the monsoon, it will be unnecessary to use water; if, however, sowing is done in the dry season, which perhaps the ryot will find the most convenient time in the year, he having then no urgent field-work to engage his attention, it will be necessary to apply water regularly until the seedlings are at the least one foot in height; but good treatment is not lost on a hedge of this kind; a fence that is properly started is always the least costly to maintain in good order. After the second year the hedge may be cut regularly once a year, and will yield a large quantity of excellent fuel. When established, a mile of such a fence under fairly good treatment in a climate similar

to that of Madras will yield annually from 30 to 40 cart-loads of cuttings, most of which would be well suited for use in the house of the ryot. The cutting should be done only after the monsoon has passed over, thus securing the fences, when at their full height, to protect growing crops from the ill effects of the high winds that prevail during the monsoon.

46. *Deep and shallow cultivation.*—Some most mischievous opinions have recently been spread through India regarding the effects of deep cultivation in hot climates; I feel it my duty, therefore, to state most unreservedly that the result of my six years' experience in actual cultivation in one of the hottest parts of Southern India has convinced me beyond all doubt that the advantage that the Madras farmer will secure by deeply tilling his soil can scarcely be overrated.

47. Shallow cultivation is the curse of Indian agriculture, and the man who can induce the ryot to add an extra inch or two to the depth his tillage operations extend, will be as much entitled to the gratitude of his country, as the man who makes two blades of grass to grow where only one grew before.

48. Now in referring to deep cultivation or deep tillage I do not necessarily mean deep ploughing; it is here, I believe, where the mistaken opinions before noticed have originated. By deep tillage or deep cultivation I mean that the soil must be deeply stirred or loosened by the cultivator, the subsoil plough, &c. As a general rule all soils will be benefited that are thus treated; but the case is different with deep ploughing when the soil is unfitted, as there are many soils that would be temporarily injured by being suddenly deep ploughed, such soils for instance as those resting on a tenacious soapy subsoil, which in the process of deep ploughing would be brought to the surface and would render the surface soil unproductive until physical and chemical agencies had again restored it to a condition fit for the growth of crops; and it would be equally as unwise to bring up to the surface, by working the plough more deeply, portions of a subsoil, which is poorer than the surface soil, or that is calculated to injure the surface soil in its physical character.

49. As a general rule deeper ploughing should be done gradually, that is, the process of deepening should be the work of time, though there are soils that may be deepened at once without any bad results following. It should be remembered that in deep ploughing the under soil is always brought to the surface, while in deep cultivation the under soil or subsoil remains in its original position, its particles being merely loosened, thus allowing a free passage for air and water.

50. A dry season brings out in a decisive way the results of deep culture; during the long drought experienced last year the maize plants growing on a piece of land on the Experimental Farm that had been subsoil drained in the previous year, were more than twice as large, and proportionately luxuriant that grew over the newly-filled drains, than the plants that grew on the land between the lines of drains, the former during the greatest heat were always remarkably luxuriant, they drew their supplies of moisture far down below the parched surface soil, while the plants on the intervening spaces were puny and sickly, their roots not being able to penetrate more than a few inches below the parched upper soil. Similar results I have always obtained whenever I have had the soil deeply cultivated. I have gradually year after year deepened the cultivation on the Sydapet Farms until the soil is fully 50 per cent deeper than similar soils under ordinary native farming, and I would gladly go deeper still; indeed I feel sure that we can never secure good average results from our farming until we do cultivate deeper. In the hottest season the crops on the deeply tilled soil are generally fresh and luxuriant in appearance, while those growing on shallow soils are parched and withered.

51. *Want of enterprise in the Ryot as shewn by his carelessness regarding the quality of the field seeds he sows.*—Native cultivators pay but little attention to the quality of the seed they sow; this neglect is the result of ignorance or apathy, it cannot be said to be the result of want of means—the too common apology offered for all the shortcomings of the ryot—for in many cases a little personal labor expended in separating the seed is all that is required. The extra cost of the seed for an acre of land of the quality it is advisable to sow would seldom be more than one rupee, while the return obtained from this seed may be many rupees greater than the return from inferior seed.

52. Again native cultivators will persist year after year in sowing seed, the produce of their own land, rather than put themselves to the trouble of sending a few miles for fresh seed the produce of soils of a different description to those they cultivate.

* * *

54. The loss that results from the use of bad seed and from thick seeding will, I have little doubt, annually represent a sum equal to, at the least, one half of the sum paid per acre in the form of Government assessment on the arable land of this Presidency, in other words by the exercise of a little intelligence, and by the expenditure of a small amount of labor, most ryots holding arable land could reduce their annual assessment 50 per cent—a result which I should imagine all would be glad to secure—and yet how few there are who could be induced to put in force the means required to produce these results.

* * *

CYDAPET EXPERIMENTAL FARM.

56. *Cattle.*—With the view of effecting some improvement in the cattle of the district around Madras, it is intended to import a few animals of the Aden breed. One bull, two cows, and two calves have been purchased, for shipment from Aden to Madras by the first favorable opportunity. The Adens have a high reputation as dairy animals; the name Aden by which they are distinguished has probably originated from Aden being the port from which cattle of this breed are generally shipped, they are not found in the neighbourhood of Aden, but are brought from districts situated at considerable distances from the coast. They are small animals, and the bulls of the breed are therefore better suited for use in the early stages of experiments in improving the breeds of small cattle generally found in Southern India than are bulls of the Nellore and Mysore breeds, which in some instances have been used for this purpose. To shew how great a mistake it is to use bulls of these large breeds in attempting to improve the cattle of Southern India, it is only necessary to mention that a cow of an average size generally weighs from 200 to 300 lbs. live weight, while a good bull of the Nellore or Mysore breed will weigh from 900 to 1,000 lbs.

57. In attempting to improve breeds of cattle, great care should be exercised in order that the increase in size bears a strict relation to the supply of food available. In most parts of this Presidency during the dry months, even in a moderately good season, the food available is scarcely sufficient to preserve the lives of the undersized cattle kept by ryots, and would, therefore, be totally inadequate to do even this much for animals of a larger size.

58. Before taking steps for improving the size of the cattle in the more backward parts of the Presidency, it is necessary that something should be done to induce ryots to grow fodder, &c., as food for their live stock. As long as so many ryots consider that it is more economical to allow their cattle to starve or even to die in the dry season

rather than to go to the trouble of growing fodder for their use, it will be exceedingly unwise to attempt to increase the size of the cattle they keep.

59. The increase in the size of the draught cattle of Southern India is highly to be desired; greater size means more strength, deeper cultivation, better crops.

60. Native cattle like native laborers can adapt themselves readily to the bad conditions with which they have so frequently to contend. A cooly, while work is abundant and food cheap, takes his three meals per day; as the work becomes less abundant or food dearer, he reduces his allowance to two meals per day; and he will manage to exist even on one meal per day when out of employment or food is very dear. The starving process is gradual; the people become accustomed to it. It is the same with cattle; they can be starved down to, and be kept alive, for a time, on a daily allowance of food that would represent only a tithe of the quantity they could consume when in full health. This is the ordinary process to which they are subjected every hot season at the hand of their owners. But while it is possible to reduce grdually the daily food of a bullock until in amount it would not be one-tenth of the allowance that should be given, it is not so easy again to increase without injury the daily allowance of food to the quantity necessary to support the animal in health; hence the enormous losses that are experienced in this country amongst live stock when after a long drought a sudden fall of rain produces a luxuriant and plentiful growth of grass. Few cattle die directly from starvation; the deaths in most cases are the result of the sudden supply of succulent food in abundance, greedily eaten by animals whose constitutions have been weakened by a long and gradual starving process.

66. *Sheep.*—The sheep breeding experiment continues to progress in a satisfactory way. There is a decided improvement in the quality of the wool now obtained from our sheep; when we commenced the experiment the wool yielded by most of them was exceedingly coarse and almost quite straight; it is now finer and is a great deal more curled. There is, of course, very much yet to be done before the average quality of the wool is even moderately good, but the improvement that has been effected is very encouraging.

67. At one time I feared that in this hot climate but little could be done towards improving the quality of wool; but though the intense heat is a great drawback we possess one advantage over people resident in a cold climate in being able to grow crops throughout the year for the use of sheep, and this is a very important advantage in wool growing. When sheep are alternately starved and overfed, their wool is always very irregular in strength and quality, the portion of the staple produced during the period when food was scarce being always weak.

68. As our experiments have shewn that we can produce green food throughout the year, I now see no reason why we should not ultimately produce fine wool; it must be remembered that some of the finest wools produced in the world are grown in countries in which the temperature has a high average range; for instance in Spain, Southern Germany, the Southern States of America, the Northern Districts of Australia, &c.

69. It will, of course, take a long time to produce a fine wool from the Sydapet breed of sheep; but by judicious crossing with fine wool producing breeds that will stand the intense heat experienced in Madras during the hot season, we may bring about the desired results in much less time.

99. *Paddy Fodder—green, and dry.*—I have already directed attention to indigenous paddy as a fodder producer. During the past year we grew a considerable quantity of this fodder; it is readily eaten by all kinds of farm stock; when produced on land in a good manural condition it is of course much more nutritive than when grown under the conditions that characterize native farming. It is not so well adapted as a food for dairy stock as is cholum fodder; a milch cow when consuming daily 45 lbs. of cholum fodder yielded three measures of milk per diem but when paddy fodder was substituted, though a similar weight was consumed, the yield of milk was reduced to two measures; when feeding with cholum fodder was resumed, the daily yield of milk again rose to the quantity obtained previous to the change of food. This result is not surprising when the habits of the two plants are compared; the paddy is an aquatic plant, its growth is rapid provided it meets with a sufficiency of organic food in the soil or in the water in which it is growing, a quantity of available plant food that would suffice for the wants of a paddy crop when irrigated would be altogether insufficient to meet the wants of a dry crop; irrigation water, judiciously applied, enables a plant to utilize thoroughly the food in its neighbourhood, not only by rendering that food more fit for assimilation, but by bringing it within reach of its roots. Dry crops, such as cholum, &c., grow steadily during favorable weather; as their roots have but a very limited feeding ground, merely the portions of the soil with which they are in contact, it is of the utmost importance for their healthy development that the soil should be rich in plant food, much greater in proportion than is requisite in a soil under a crop of paddy.

100. Under proper manuring and careful watering the nutritive value of paddy fodder might be considerably increased, there can, I think, be no doubt, but that the most nutritive paddy fodder that could be raised would be that produced by the least expenditure of water, especially if the field was occasionally allowed to dry for a day or two in order to admit capilliary action to exert its influence in bringing up to the surface plant food from a lower stratum of soil. Though paddy fodder as generally grown is inferior to cholum fodder, there are many circumstances under which it can be raised more easily, hence its value. For making hay for future use it is decidedly preferable to cholum, not only can it be packed more readily in stacks, but it can be kept in good condition for a much longer period.

101. Paddy hay when made into chaff is a useful food for horses; the following experiment shews the cost of this hay and the cost of chaff made from it :—

	lbs.
Weight of green fodder weighed two hours after being cut	4,396
Weight of hay after having been exposed 42 hours, during which time it was repeatedly turned and tossed	1,459

108. *Mixed Plantation of Cocoanut and Casuarina Trees.*—A plot of waste land consisting of poor sandy soil, measuring 1,190 square yards, was planted with cocoanut

and casuarina trees, partly to utilize the ground, but chiefly as an experiment in view to ascertain the effect on cocoanut and casuarina trees of a moderate dressing of manure. A line of cocoanut trees and a line of casuarina trees six feet apart were planted alternately over the whole plot. The dimensions of the pits for the cocoanut trees were width each way 24 inches, and depth 27 inches; the pits for the casuarina trees were 18 inches deep and 18 inches wide in each direction. The cocoanut trees had been raised on the farm from nuts; the trees were fifteen months old when planted out; they were planted 12 feet apart in the lines. The casuarina seedlings were about three months old and were bought from a nursery-man at Rs. 5 per thousand; they also were planted with intervals of 12 feet between each. The planting of the ground took place on the 11th of February 1873; there are 134 trees on the plot of which 69 are cocoanut trees. From the time of planting until the 31st of March last the ground has been irrigated twelve times and hoed five times. At the time of planting each pit was manured, four cartloads of blood manure being used for the whole plot; in February 1874 each tree was manured, with two pounds of oil cake, the casuarina trees were pruned nine months after planting, and again in the following March. A few of the trees having failed, they were replaced by seedlings in November last.

109. The appearance of the trees is most promising; their further treatment will be carefully placed on record; it is very desirable that something should be done in order to provide fuel at a moderate price, and in this way set free cow-dung, &c., for use in manuring the soil, instead of as at present, being used as fuel.
